 Certified Personal Trainer

Class Descriptions

Balance in Motion (1,2) - Class is designed to improve your balance by strengthening your feet, ankles and legs; improving coordination; and training core strength. It will help improve posture while enhancing reaction and focus.

Basic Strength (2,3) - Gain strength and range of motion through traditional strength training exercises.

Basic Stretch (2,3) - Specific movements to improve overall, full body flexibility.

Cardio & Osteo (2,3) - To improve your cardiovascular and bone health, this low impact aerobic and strength training class uses traditional floor aerobics, free weights, and resistance equipment to help strengthen your heart, muscle and bones. Great to reduce the risk of osteoporosis, osteopenia and osteoarthritis.

Core Matters (2,3) - Targeting muscle groups in the core while adding some upper body exercises to improve strength and range of motion.

Exercise and Movement for Parkinson's (1,2) - An exercise class that has been specially designed to improve symptom-specific concerns such as: mobility, posture, balance, and gait while reducing joint stiffness. This is accomplished through dancing, shadow boxing, stepping over obstacles, marching and simple games that make this a fun and relaxed way to improve your quality of life!

Functional Movement (2,3) - Gaining structural balance and well-being through movement.

HIIT (High Intensity Interval Training) (2,3, 4) - All out intense bursts of exercise followed by short recovery periods. This includes cardiovascular and strength focus.

Muscle (2,3,4) - The participant will explore strength, toning and functional benefits of this exercise class using a variety of resistance and weight equipment to improve body movement and overall health.

Pilates (2, 3) - Balancing all muscle groups with an emphasis on challenging the core. This class may not be appropriate for those recovering or suffering from any type of back injury.

Silver Sneakers Circuit (2,3) - Fun class using low-impact, standing choreography alternated with standing upper body work with hand-held weights, elastic tubing and Silver Sneakers balls.

Silver Sneakers Yoga (1,2) - You will move your whole body through a series of seated and standing yoga poses. Chair support is offered to safely perform a variety of postures to increase range of motion. Restorative breathing exercises and final relaxation will promote stress reduction and mental clarity.

Smooth Flow Yoga (2,3) - Moving through a series of Yoga poses to improve strength, flexibility and range of motion. Participants must be able to move from standing to floor exercises to find success in this class.

Step (3,4) - Using an elevated platform with choreographed step combinations to increase heart rate and build cardiovascular endurance.

Step & Strength (2,3) - Step class with additional set of exercises added to increase muscular strength and endurance.

STRONG by Zumba (2,3, 4) - Stop counting the reps. Start training to the beat. This class combines body weight, muscle conditioning, cardio and plyometric training moves synced to original music that has been specifically designed to match every single move. Every squat, every lunge, every burpee is driven by the music, helping you make it to that last rep, and maybe even five more. In a one-hour class you will burn calories while toning arms, legs, abs and glutes. Plyometric or explosive moves like high knees, burpees, and jumping jacks are interchanged with isometric moves like lunges, squats, and kickboxing. Instructors change up the music and moves frequently to make sure you're always challenged to the max.

Yoga (2,3) - Moving through a series of Yoga postures to improve strength, flexibility and range of motion. Participants must be able to move from standing to floor exercises to find success in this class.

Yoga Basics (1,2) - This class is designed for beginners with a focus on basic postures. Adaptations can be given for those with medical issues.

Yoga-lates (2,3) - A fusion of Yoga (flow) and mat Pilates. Think core strength plus flexibility with emphasis on strengthening the core (abdominals, back, hips & glutes).

Levels of Intensity: (1) Beginner with a chair (2) Beginner (3) Intermediate (4) Advanced

Columbus Regional Health Fitness Classes & Facility December 2018

One Great Fitness Center, Several Class Locations, Many Class Options & Levels and a Variety of Fee Structures all geared towards Your Healthy Lifestyle!
